# 2023, The Year of Safety and Environmental Conservation: Let's Carry On!

We've experienced a lot in 2023. Many activities took place in the Banyu Urip Field and the village with the community. All done safely and with a sense of togetherness.

Our safety efforts received recognition, earning three consecutive awards this year – CSR & PDB Award from the Ministry of Village Development and Transmigration, Padmamitra Award, and Forum CSR Indonesia.

Celebrating 5 million injury-free hours for the construction team and 3 million injury-free hours for the Operation Support team this year. Achievements like these are possible thanks to our collective hard work, focus, and consistency in strengthening the safety culture.

Safety culture is a core value in our workplace and community. We continue educating the community on the importance of safety, not just around the Banyu Urip and Kedung Keris facilities, including the pipeline and FSO Gagak Rimang, but also in their own living environments. Environmental preservation is crucial, and we realize this through various greening programs – from mangrove planting on the coast to tree planting in vegetation-deficient areas in Bojonegoro and Tuban.

During a recent Employee Volunteer Day, we planted trees with the community, marking the preservation of the spirit of cooperation and the strengthening bond between Banyu Urip Field workers and the local community.

On World Tree Day in November, we encouraged all Banyu Urip Field workers to contribute by planting and caring for trees in our work environment. The enthusiasm displayed by our workers reflects our love for a thriving and sustainable environment.

Let's maintain these positive efforts and strive for improvement next year. Engaging in beneficial activities for the community, environment, nation, and country. •

**Muhammad Romadhona**

Banyu Urip Maintenance Superintendent

## Collaborative Voluntary Efforts for a Better Environment

Banyu Urip Field Volunteers participate in teaching and inspiring students at Bonorejo Public Elementary School. The students are enthusiastic about various games and teaching aids provided by the volunteers.

### ExxonMobil Cepu Limited (EMCL) dives back into community service. The ExxonMobil Volunteer Program (EVP) titled "Bebarengan Mbangun Desa" took place in the villages of Bonorejo and Mojodelik last October.

A total of 67 EMCL volunteers participated in various community service activities, including environmental cleanup, teaching English at elementary schools, tree planting with the community, and assisting in harvesting local agricultural produce.

Since 2006, ExxonMobil in Indonesia has dedicated over 25,700 volunteer hours through various community volunteering initiatives. Volunteer activities are part of EMCL's commitment to being a good neighbor wherever we operate. ▪

Banyu Urip Field workers, along with the Head of Mojodelik Village and residents near Sendang Lego, Mojodelik Village, Gayam District, Bojonegoro Regency.

Volunteers transport trees to be planted around Sendang Lego. The well in Mojodelik Village needs many trees for planting to aid rainwater conservation, ensuring a greater water supply.

**"Let's continue to uphold this spirit of mutual cooperation. Besides strengthening our togetherness, it also preserves the lush and sustainable environment."**

**Palupi Hadi Pratih Dewanti**  
District Head of Gayam

# The Fishing Community Promoting Environmental Awareness and Safety around FSO Gagak Rimang

Fauzi and members of the Sedayu Lawas Fishermen's Association, advocates for greening and mangrove preservation along the Tuban – Lamongan border region.

Every day, Fauzi nurtures and sows mangrove seedlings to be planted along the coastal area of Sedayu Lawas Village, Brondong District, Lamongan Regency.

**Fauzi and the Sedayu Lawas' Fishermen Association, Brondong District, Lamongan Regency, are committed to preserving the mangrove areas there.**

Stretching nearly a hundred hectares along the coastal downstream of the Bengawan Solo River, over 200 thousand mangroves thrive, with 14 thousand as part of ExxonMobil Cepu Limited's (EMCL) Community Development Program in collaboration with the fishermen's association. By preserving these mangrove areas, the fishermen aim for better air, more fish, and a well-maintained beach.

Beyond planting, the fishermen also emphasize safety to their peers, both at home and at sea, including approaching the safety zone of the Floating Storage and Offloading (FSO) Vessel Gagak Rimang. Similar efforts are undertaken by fishermen in Karangagung Village, Kingking Village, and Karangsari Village in Tuban Regency, as well as in Lohgung Village, Brengkok, Labuhan, Brondong, and Paciran Village in Lamongan Regency. •

Mangroves provided by EMCL, planted for two months in the designated area by the Sedayu Lawas Fishermen's Association. Fishermen will replace damaged or non-growing trees with new ones from the nursery.

**"In our community, it's customary to watch out for one another, ensuring everyone's safety from the moment we set out until we return home to our families."**

**Mohammad Fauzi**  
Chairman of the Sedayu Lawas  
Fishermen's Association

Fauzi ensures the planted mangroves grow well and strong, aligning with the planned quantity for maintenance in the area.

## Outstanding Recognition for Safety Culture at Banyu Urip and Kedung Keris Fields

Director General of Oil and Gas, Tutuka Ariadji, presents the Subroto Award. This recognition acknowledges efforts in maintaining safety values in secure and reliable operations, contributing consistently to Indonesia's economic growth.

**For four consecutive years, ExxonMobil Cepu Limited (EMCL) has been honored with the Subroto Award for excellence in safety and natural gas utilization in the oil and gas sector.**

EMCL also received two prestigious awards from the Ministry of Energy and Mineral Resources (ESDM). The Patra Nirbhaya Karya Utama Adinugraha was awarded to EMCL for outstanding achievements with over 40 million safe working hours without accidents.

The Patra Karya Raksa Tama recognizes EMCL's significant contribution to improving workplace safety, reaffirming EMCL's commitment to safety in meeting Indonesia's energy needs. •

EMCL is also honored with the Patra Nirbhaya Karya Utama Adinugraha and Patra Karya Raksa Tama Awards.

ExxonMobil Cepu Limited (EMCL) once again secures three safety-related awards.

**"It's a recognition for our safety efforts. Let's keep working to do even better."**

**Carole J. Gall**  
Presiden ExxonMobil Indonesia

# Workers' Dedication in Planting and Nurturing Trees

Workers donate trees to be cared for in the tree nursery at Banyu Urip Field.

## World Tree Day marks the love of Banyu Urip Field workers for the lush, green environment.

Throughout the month from October to November 2023, workers took turns bringing trees to the tree nursery at Banyu Urip Field. On World Tree Day, they planted these trees near their workplaces, committing to nurture them until they grow tall. These trees will become their daily companions at work.

In addition to expressing environmental love, this movement echoes the call from SKK Migas with the theme One, Two, Trees – urging upstream oil and gas industry members to plant two trees each.

To date, ExxonMobil Cepu Limited (EMCL) has planted over 14,300 trees within the Banyu Urip Oil Field area. Additionally, over 100 thousand trees have been planted with communities in Bojonegoro, Tuban, and Blora Regencies. We continue to ensure this positive movement sustains and grows, inspiring everyone. ▪

**“I must take care of these trees, just as they take care of me by providing oxygen to breathe.”**

**Ria Setiyaning**  
EMCL Employee

Tree-planting action during the World Tree Day Celebration at Banyu Urip Field.

# Banyu Urip Canteen: Creating a Sustainable MSME Ecosystem

Acting Regent of Bojonegoro, Adriyanto, along with the Secretary of Bojonegoro, visited and enjoyed the cafeteria's dishes during their visit to Banyu Urip Field with the Bojonegoro Regency Government officials.

Journalists from Bojonegoro and Tuban visited Banyu Urip Canteen and enjoyed the provided meals.

**Alongside product development and business management, MSMEs are also assisted in accessing markets through ongoing mentoring efforts implemented at Banyu Urip Canteen.**

Banyu Urip Canteen offers daily meals such as rice and side dishes, various snacks, clothing, and knitted products that workers can purchase as souvenirs. The canteen is managed by the Business Incubation Center (PIB) Bojonegoro, a mentoring facility for MSMEs supported by EMCL. To meet the sales demand at the canteen, PIB involves 22 MSMEs from around Banyu Urip and Kedung Keris Fields.

Since 2016, EMCL has supported 195 MSMEs from 134 villages in Bojonegoro, Blora, and Tuban Regencies. In addition to the canteen, a similar collaboration is carried out with the Agricultural Business Producer Cooperative (KPA), which supplies rice for catering at Banyu Urip Field. At least, KPA has supplied more than 26.5 tons of rice since 2022. ▪

To facilitate buyers, transactions at Banyu Urip Canteen have implemented digital payment channels.

Banyu Urip Canteen has become a go-to place for workers to buy breakfast before starting their work activities.

Local MSME practitioners from Bojonegoro are visiting Banyu Urip Canteen, gaining knowledge on how they can partner there.

**"Sustainable mentoring has been instrumental for MSME practitioners. They can continue production, and their products will always find buyers."**

**Adriyanto, SE., MM., Ma., Ph.D**  
Acting Regent of Bojonegoro

## Weaving Hope, Embracing the Future

Participants from the Bojonegoro Disability Hub engage in a guided knitting training provided by the Sri Sasanti Foundation.

**Defying physical limitations, Sulistiyah never let anything hold her back from growth. Now, she's on a mission, doing remarkable things for the well-being of her family and friends – even mastering the art of crafting knitted products.**

Knitting wasn't a skill she possessed before. Sulistiyah, 40 years old, was more into sewing. Her profession as a tailor was well-known among neighbors and friends with disabilities.

However, when she joined the knitting program for people with disabilities organized by ExxonMobil Cepu Limited (EMCL) in collaboration with the Sri Sasanti Foundation, Sulistiyah quickly excelled. Among the 30 other participants, she was the quickest to master knitting and create products.

Sulistiyah independently develops her products. Now, she can sell bags, wallets, keychains, bottle covers, and mask connectors. "Mbak Sulis's products are market-ready," said Laras, a program facilitator from the Sri Sasanti Foundation. Sulis admits that her products are well-received by customers, including school teachers, study group colleagues, and office workers. ▪

**"I continue to learn from social media and the internet. I am confident that I can further improve my knitting products and encourage fellow individuals with disabilities to progress together."**

### **Sulistiyah**

Member of the House of People with Disabilities (RBD) Bojonegoro

Sulis, along with her husband and child, form a cohesive family marketing their knitted products both at home and in the Bojonegoro town square.
